

Site Solutions

Site Solutions (BW) Limited is part of the Site Solutions Group.

Site Solutions (BW) Limited specialise in the management of bulk waste.

**Whatever the waste;
organic,
inorganic,
mixed,
hazardous –
call us and we
will turn over
every stone to
find a home
for it!**

How we work

Call or email the team to discuss your requirements.

We have an extensive network allowing us to find the most efficient solution.

We will arrange collection where bulk waste will be recycled, recovered or disposed of as appropriate.

Bulk Waste Types

We provide comprehensive waste management solutions for all types of bulk waste streams – no matter how complex or unusual they may be.

We have the tools to safely and responsibly handle proper disposal.

Persistent Organic Pollutants

Includes upholstered domestic seating (sofas, armchairs, upholstered dining and office chairs etc.)

Mixed Waste

Everyday construction and demolition residual waste.

Controlled Waste

Waste that is subject to legislative control in either its handling or its disposal. Including domestic, commercial and industrial.

Metal Waste

Metals left over from product manufacturing and consumption, such as parts of vehicles, building supplies, and surplus materials.

Textile Resin Waste

We are talking here about composites such as carbon fibre or fibreglass used in many applications from boat building to wind turbine blades. When this material reaches the end of its useful life it is hard to repurpose or recycle, but there are options other than landfill.

Liquid Waste

Commonly wastewater, oils, acids and sludges, both hazardous and non-hazardous. See if we can help find a compliant treatment route for your liquid wastes.

For more information or to find out about another bulk waste type not listed, get in touch with the team today:

Bulk Plasterboard Waste

We are proud that 100% of plasterboard we collect and manage is either recycled, reused or repurposed.

We are one of the largest handlers of plasterboard waste nationwide. Due to the volumes of plasterboard we handle, we are able to provide the most competitive rates in the market. All of the plasterboard waste we collect is either recycled for use in new board or used in agriculture.

Recycled plasterboard is widely used in the construction, manufacturing and agricultural industries.
