Types of waste

Site Solutions are well equipped to manage, facilitate and dispose of just about any type of waste nationwide, but also to dispose of it correctly.

General Mixed Waste

This includes non-hazardous common everyday commercial rubbish.

Controlled Waste

Waste types include domestic, commercial and industrial waste that is regulated because of any toxic or hazardous materials.

Large Volumes of Inert Waste

Include such things as sand, soil and concrete. These wastes are bulky and heavy.

Contaminated Soil

The ground, be it soil or some other substrate, can get contaminated in lots of ways. One common way is through a spill of oil or fuel (such as kerosene).

Fly Tipped Waste

The illegal disposal of hazardous or non-hazardous waste on land or water without a licence.

Liquid Waste

Commonly wastewater, fats, oils or grease (FOG), gases or sludges, both hazardous and non-hazardous.

The waste market is very complex and heavily regulated, we have the expertise in dealing with all types of waste including both hazardous and non-hazardous waste.

Not sure what waste solution you need?

Types of skips

Waste Management Solutions

6yd - 40yd Skips

6yd - 8yd skips available for light & heavy waste.

12yd - 16yd skips available for light & bulky waste.

20yd - 40yd skips available for high volumes of light & bulky waste.

Roll On Roll Off Skips

Suitable for commercial use only. Two main types of roll on off skips available:

- 15-20yard skips available for greater volumes of waste and ideal for heavy materials.
- Larger 40yard roll on off skips are used for larger volumes of 'light' waste. This skip is not suitable for heavy materials.

Enclosed Skips

Available for the safe storage and disposal of larger volumes of waste. Offering security & protection from the elements.
